- Computer Center
- Reading Area
- Play room
- Resource Center

After-School Educational Service

Our After-School Educational Service is a component of our Educational Enhancement Program. This service works to provide assistance that can be individually adapted to a learner, or administered in small group, peer, and/or large group settings. We aim to engage and impact each learner in such a way that learning and the pursuit of knowledge and understanding becomes exciting. One of our primary goals is to make students aware of the urgency and importance of a sound education. Learners are equipped with the fundamental skills to study effectively, making learning a reality for any student. Through social development, character and relationship building, learners are able to relate responsibly and respectfully with peers and instructors. We celebrate cultural differences rather than viewing these differences as a weakness. Differences invite new experiences that establish themselves as a spring board for enriching learning experiences. Our facilities are located in the heart of communities in order to establish a presence, create lasting relationships and to make support more accessible.

Our Staff

We are equipped with highly qualified instructors and mentors holding various academic degrees. We possess over twenty-five (25) combined years in leadership and training experience. Our staff also has

- Experience teaching a variety subject matter,
- Experience working with students having special needs
- Experience working with students of similar cultural background and social economic issues
